

Mixmax Task Submission

Instructions for a start:

- Read Challenge Tasks to understand what is asked to be done
 - Figure out which technology stack to use and how to structure a project
 - From a zip file you got, create:
 - structure for an automation project, from scratch
 - bear in mind that project should be runnable and easy for 'plug and play' on any machine
 - define instructions for running a project or tests itself
-

UI Functionality

Github Repository with a README Document: [SauceDemo](#)

API Functionalities

Github Repository with a README Document: [Petstore](#)
