

## Bug 4: User can sign up with invalid email address

### Reproduce steps

1. Open web page '<https://petstore.octoperf.com/actions/Catalog.action>'
2. Click 'Sign In'
3. Click Register Now!
4. Enter userID: 'random830291'
5. Enter new password: Test123!
6. Enter repeat password: Test123!
7. Enter 'Test' in firstname, lastname, address1, address2, city, state, zip and country
8. Enter email: 'invalid email 12345'
9. Enter phone: 803928109
10. Click Save Account Information

### Actual result

The screenshot displays the petstore.octoperf.com website interface. The top navigation bar includes a 'Sign In?' link and a search bar. Below the navigation bar, there are links for 'Fish', 'Dogs', 'Reptiles', 'Cats', and 'Birds'. The main content area features a large image of a green parrot, surrounded by smaller circular images of various animals: a fish, a dog, a cat, a bird, and a reptile. To the right of the website, a network inspector window is open, showing the 'Network' tab. It lists three requests: a POST request to 'Account.action' (status 302), a GET request to 'Catalog.action' (status 200), and a GET request to 'favicon.ico' (status 404). The 'Form data' section of the 'Account.action' request is expanded, showing the following data: 'username: test\_user789880', 'password: Test123!', 'repeatedPassword: Test123!', 'account.firstName: test', 'account.lastName: test', 'account.email: invalid-email-12345' (highlighted with a red box), 'account.phone: test', 'account.address1: test', 'account.address2: test', 'account.city: test', 'account.state: test', 'account.zip: test', 'account.country: test', 'account.languagePreference: english', 'account.favouriteCategoryId: FISH', and 'newAccount: Save Account Information'.

### Expected result

Error message which tells the user that email address is invalid
